Suilvision Puma Bay Camera E

The camera motorised lens provides a viewing distance of 2m - 10m ideal for monitoring parking bays. Suitable for single bay monitoring when fitted into a wall, post or under a canopy.

The all new Puma Bay Monitor Camera E has an aluminium extruded IP65 rated housing, integrated intelligent IR lights and processor making it a complete stand alone unit. The camera is fitted with a motorised Zoom/Focus lens controllable via the camera app enabling the user to set the perfect viewing area for a single bay. The camera utilises Suilvision core ANPR platform providing excellent plate reads 24/7.

High Quality images 24 hours a day, accurate plate reading. A range of interfaces allowing users to connect and use their own management software.
