

The all new Puma Bay Monitor Camera comes as an internal module camera. The internal camera module has been designed to fit inside a bollard type housing. The camera is fitted with integrated intelligent IR lights and processor making it a complete stand alone unit. The camera utilises Suilvision core ANPR platform providing excellent plate reads 24/7.

The camera has a factory fitted fixed lens providing a viewing distance of 1m - 5m ideal for monitoring parking bays. Suitable for single bay monitoring when fitted into a small bollard type housing or incorporated into an EV charger.

**Bollard Example
(not included)**

High Quality images 24 hours a day, accurate plate reading. A range of interfaces allowing users to connect and use their own management software.

Puma Bay Camera
